

Concordia: Keep Baltoro Clean team collects 4tons of trash

4000 kg of waste has been collected from Concordia since May 10 by the "Keep Baltoro Clean" expedition, launched by the team. The expedition has also installed 8 eco toilets at Concordia Circus and transported eighty drums of human waste downhill to Paiju to be burned.

The toilets were carried, piece by piece, by porters from Askole.

The clean-up team, all Pakistanis trained by Maurizio Gallo (expedition leader of this as well as K2 clean-up expedition), will complete the work on the Glacier until end August.

"The collection at the K2, GI, GII and Broad Peak base camps (approximately 5,500 m altitude) must be completed. The waste left there during the last season," organizers stated.
