

WHEN LIVESTOCK KEEPING MEETS CONSERVATION

**L. Rossi, I. Victoriano Llopis, A.
Giorgino, A.N. Naqvi**

Dept. Veterinary Sciences, University of Torino (IT)
Faculty of Life Sciences, KIU, Gilgit (PK)

..... or smoother options
(eg, less heads/improved health and performance)

- a) is overgrazing by livestock a true limiting factor of wild caprines within CKNP?
- b) which are the livestock diseases worth contrasting first for the benefit of free-ranging wildlife in the area?
- c) how can we sustainably contrast these diseases?

49% vs 1.8% PPR+

Thank you very much for your attention
